"If we employ the resources that we have in Army Aviation in the proper fashion, there is a major contribution to be made to winning a war on the modern battlefield . . ."

## WE FACE SOME CHALLENGES

THE REMARKS OF GENERAL BERNARD W. ROGERS, CHIEF OF STAFF, U.S. ARMY, AT THE AAAA NATIONAL CONVENTION, ARLINGTON, VA., OCTOBER 14, 1978.

**P**RESIDENT Williams, distinguished awardees, fellow soldiers, friends of aviation in the Army, and ladies and gentlemen. It's my honor to be here to participate on this occasion as we recognize and do honor to the soldiers and civilians who have achieved so much in the year for which they are recognized in the field of Army Aviation.

Just prior to World War I, so the story goes, at an Aerodrome just outside Paris, **Marshall Foch** was watching the aerial wizardry of the time, and when it was concluded, he turned to one of his assistants and said, "That looks like a great sport, but I tell you - for the Army - aviation has very little use."

Now it's easy for us, in hindsight after two-thirds of a century and several intervening wars, to put the lie to that prophecy.

### Grasp the opportunities!

But what's not easy for most of us is to grasp the opportunities of the present and to develop the potential offered to us to the fullest - and in this room tonight, there are those of you who have, from the very beginning,

grasped the opportunities of Army Aviation in the modern era and you have continued to develop that potential, and thereby enhance the capability of the Army to provide its part in the security of this Nation.

### We're proud of you

I want you to know that the Army is proud of you and grateful to you for what you've done and continue to do.

We face some challenges throughout the Army in almost every area - and we face a challenge today in Army Aviation. We face the challenge of convincing those who control the destiny of Army Aviation that there is a major role to be played on the modern battlefield by the helicopter.

I, too, at one time, was a doubting Thomas, as to the survivability of the helicopter on the mid-intensity battlefield. But I was convinced several years ago if we employ - with the expertise which we must employ - the resources that we have in Army Aviation in the proper fashion - that there is a major contribution to be made to winning a war on the modern battlefield.

(CHALLENGES/Cont. on P. 56) 2

# Ahead of TIME

The United States Army's Advanced Attack Helicopter (AAH) is the most advanced helicopter ever built. Ahead of time in technology, performance, survivability and mission capability.

As an indispensable member of the combined arms team, the AAH-64 is a total system for battle.

Designed by Hughes, built by the most professional industrial team ever assembled.

The Advanced Attack Helicopter— ahead of time. For further information, call or write Carl D. Perry, Vice-President, Marketing, Hughes Helicopters, Centinela & Teale Street, Culver City, California 90230.

## MAGAZINE DETAILS

ARMY AVIATION (ISSN 0004-248X) is published monthly, except March and December by Army Aviation Publications, Inc., Westport, CT 06880. Editorial and Business Offices: 1 Crestwood Road, Westport, CT 06880. Phone: (203) 227-8266 or 227-0948. Subscription rates for non-AAAA members: \$9, one year; \$17, two years; add \$7.50 per year for foreign addresses other than military APO's. Receipt of change of addresses are acknowledged by publication of the residence change in the PCS or "Take-offs" column of the magazine. Manuscripts, photos, or other material cannot be returned unless accompanied by a stamped, self-addressed envelope. Display and classified advertising rates are listed in SRDS Business Publications, Classification 90. Second class postage paid at Westport, CT.

# Leapfrog.

Under modern tactical conditions, the key to ground defense is mobility and flexibility . . . demands uniquely met by the versatile CH-47 Chinook helicopter. Regardless of the condition of terrain—jammed highways, damage to roads, rail lines, or bridges—the Chinook has demonstrated its ability to leapfrog firepower, materials and troops to critical positions. It resupplies ammunition and fuel. It keeps

artillery, armor and armed helicopters fully effective. It recovers equipment and evacuates wounded. To meet and counter a lightning thrust, the Chinook is an indispensable tool of the ground commander . . . an absolute necessity in tactical and logistical planning. To stay a jump ahead.

**BOEING VERTOL  
HELICOPTERS  
THE LEADING EDGE**

# Grumman IACS. For pilots. By pilots.

Flying nap-of-the-earth demands heads-up attention. Fewer knobs to twist and displays to read means the pilot can keep his eyes outside the cockpit and on the objective.

When the Army asked for simplified cockpits, Grumman went to seasoned Army pilots and molded an Integrated Avionic Control System precisely to their needs.

The result...ten separate

navigation and communication controls combined into a single unit...positioned and displayed to gain extra split seconds for greater concentration outside the cockpit.

A system designed by pilots for pilots.

Designing cockpits and integrating avionics are just two of the things we do best. Ask the people who drive F-14s, Hawkeyes, and Gulfstreams.

**"A RESOUNDING SUCCESS WITH  
A PROFESSIONAL PROGRAM UN-  
MATCHED IN RECENT YEARS."**

---

**T**HE 20th National Convention of the AAAA proved to be a resounding success with a professional program unmatched by any in recent years.

Presentations and remarks by senior Army leaders, including the Chief of Staff and the Under Secretary of the Army, provided attendees with a reaffirmation of our resolve towards accomplishment of our mission.

Excerpts of the proceedings and specific remarks of the key speakers will be published in this and subsequent issues. I urge you to read them since they reinforce the confidence and priority reposed in the Army's aviation program.

As is now custom, one of the big-

---

**An after action report by  
BG CARL H. McNAIR, JR.,  
Aviation Officer, DA**

---

gest highlights of the convention was the presentation of awards to the outstanding aviation units and aviation personnel of the year. To these individuals and units go the kudos of the entire aviation community.

## **A newly-activated unit**

In mid-October, I had occasion to visit Fort Hood in conjunction with the training and test of the 504th Combat Electronic Warfare and Intelligence (CEWI) Group, a newly activated unit designed to enhance our electronic warfare and intelligence collection and dissemination operations at the corps level.

Organic to the 504th is the 15th Military Intelligence Battalion (Aerial Exploitation), formerly-13th Aviation Battalion. Designated as an Aerial Exploitation Battalion, it is comprised of an Aerial Surveillance Company (OV-1D) and an Imagery Interpretation Company co-located with Battalion

Headquarters at Fort Hood, an Electronic Warfare Aviation Company (JU-21's) and an ASA Aviation Company (RU-21's) located at Fort Bliss.

I was indeed impressed by all that I saw in the 504th and particularly the 15th MI Battalion. This was my first detailed exposure to a **Mohawk** unit since my Vietnam days, and I can truly say the unit is better equipped and better manned than ever before with an aircraft availability of 81%. Ably commanded by LTC "Buzz" Lasch, the 15th will undergo force development test and evaluation with its parent group, starting in September 1979.

This consolidation of Corps resources into an aerial MI battalion is another step toward close integration of intelligence and EW operations, air and ground with the land battle.

While at Hood, I also visited the **Blackhorse Brigade** and was fortunate enough to observe their mon-

thly retreat review and awards ceremony. Conducted in its entirety by the Brigade senior NCO's, with **SGM Tapeni Suiaunoa** as Commander of Troops and **CSM James W. Reed**, Brigade Sergeant Major, on the reviewing stand, it was done in the best of Cav traditions.

**COL "Bob" Molinelli**, Blackhorse "6", participated in the official presentations and remarks to the troops. The Brigade on parade, led by the NCO's, was a very fine sight. Well done, Blackhorse!

### Major conference ahead

On the Washington scene, the Annual DA Aviation Standardization Policy Board and Training Conference will convene 7-9 November to review a wide range of topics critical to our aviation readiness, training, and operations. Agenda items have been solicited worldwide, and the three-day forum will provide field commands an opportunity to review an array of aviation matters ranging from simulated tail-rotor failure procedures to ATM requirements for readiness reports.

In recent years, the scope of the conference has expanded far beyond standardization per se and now includes broad aviation policy matters as well. Be assured, this provides the aviation officers and standardization officers a direct voice at DA on matters of concern to you.

The proceedings will be officially opened and hosted by **LTG E.C. Meyer**, the DCSOPS, to whom the conference report will be submitted for approval and implementation.

With our first readiness reports now

**FT. HOOD, TX—BG Carl H. McNair, Jr.**, the DA Aviation Officer, is briefed by **SSG Ham** of A Company, 504th Combat Electronic Warfare and Intelligence (CEWI) Group, as **COL Joseph C. Wilson** (left), Group Commander, looks on.

# AAH Power

## The T700: Thoroughly proven power for the rugged AAH mission

When the Army/Hughes AH-64 Advanced Attack Helicopter arrives on the modern, tank-heavy battlefield, its T700 engines will be equal to the challenge. Backed by exceptionally rigorous testing, plus years of experience powering the Army's Black Hawk, the T700 will provide the extra reliability, survivability and simplified maintenance needed for the AAH's demanding operating environment.

GENERAL  ELECTRIC

**CARLISLE BARRACKS—** Army Aviation is well represented at the U.S. Army War College by the 21 Army Aviators in the Class of 1979. They are, front row, l-r, LTCs Merle Freitag, John H. Mayer, Thomas J. Marshall, Edward K. Lawson, and Willis R. Bunting; COL Joseph R. Koehler; and LTC Jerry W. Childers. Middle row, l-r, LTCs James A. Frick and Norman M. Bissell; COL William B. Bonnett; LTC Edward R. Cobb, Jr.; COL Nathan M. Pulliam; and LTC George F. Kraus, Jr. REAR ROW, l-r, LTCs Robert C. Watling, ARNG, and Richard C. Kaufman, USAR; COL (Dr.) John P. Heilman, Class President, and COL Roy P. Elliott; LTCs Lanny Standridge and Caryl G. Marsh. Missing: LTCs William M. Barrett and Gary D. Beech.

in under the new procedure, using the ATM as a gauge of training readiness, units are beginning to gain a better appreciation for how the ARTEP's and ATM's are really designed to facilitate training.

There may be surprises for some, but on balance, they are a real training "plus," and enhance the commander's flexibility in influencing his unit's training.

### **The final SFTS is in place!**

On 11 October, I attended a dedication ceremony at Davison AAF for the 22nd and final UH-1 **Synthetic Flight Training System (SFTS)** delivered to the Army. In their usual professional style, **COL Ben Pergerson** and his Davison team did a super job of launching this, our latest addition to the

UH-1FS fleet - complete with band, **Army Aviation Song**, and demonstration simulation flights for **MG Kenneth E. Dohleman**, Commanding General, Military District of Washington; **MG Kelly**, Commanding General, Engineer Center; **BG Akbar Ghafarri**, Deputy Director of Imperial Iranian Army Aviation; and myself.

I am pleased to report all landed safely after encountering simulated severe turbulence, hurricane force winds, and finally, a complete loss of tail rotor and gear box. (Saved by the IP again!) Future simulator acquisitions will include the CH-47FS, AH-1FS, UH-60FS, and AH-64FS.

On the subject of simulators, the most recent quarterly utilization report revealed five installations above the 80% mark and ten below. We should

take our hats off to the pace setter: **Fort Campbell**, with 100% utilization of available operating hours.

This is a real target for other units/posts to strive for.

The SFTS is a tremendous resource for training and optimum utilization is a must. In the regulatory sense, AR 95-1 stipulates that Active Component rotary wing aviators and Reserve Component aviators within the proximity (25 miles) of a simulator must fly 20 hours and 12 hours, respectively, annually in the SFTS. This permits instrument skills to be sharpened while conserving high dollar flying hours - plus it's great training in emergency procedures.

### New faces in new jobs

For those of you who may not have heard, two major Army Aviation command and staff announcements were made by the Chief of Staff on 25 Oc-

tober. In December, **MG James C. Smith**, current commander of the Aviation Center, will become the Director of Training, ODCSOPS, a newly-established directorate with a DA staff responsibility for all training matters.

**MG James H. Merryman**, currently Deputy Chief of Staff for Combat Development, TRADOC, will assume command of the Army Aviation Center and Fort Rucker.

Finally, I am pleased that this column is being read in the field. As I requested, I have now heard from a number of you on some of the key issues facing us and welcome this dialogue. It provides me, as the Aviation Officer, with an add'l feel for the pulse of aviation at the grass roots level.

If it concerns you at the unit level, be assured that it concerns us here at Department of the Army Headquarters. ◀

**FT. RUCKER**—As a Marine first lieutenant, Lawrence W. Bender makes his 'infamous' landing, the 25,000th to be made on the U.S.S. Bataan. The honor came to Bender during the Korean Conflict when, following their F4U mission, his C.O. missed his approach and was waved off, and Bender unknowingly snatched the honor. The USMC pilot later joined the Ar-

my in the AWO program. In the photo at the right, Maj. Gen. James C. Smith, USAAVNC Commander, presents CWO Bender a last award, the Meritorious Service Medal, at the post's recent monthly review. Bender, as the last of 25 ex-USMC pilots who traded their commissions for Army CWO ranks in 1956, retired with 36 years of military service.

The Navy joins  
the Army.

When the United States Navy awarded Beech Aircraft a contract to produce C-12 military transports, it joined the ranks of some very distinguished company. Namely the United States Army. And the United States Air Force.

And now, for the first time ever, one company is supplying the same aircraft to all three branches of the Armed Services.

This interesting commonality of C-12 aircraft offers the Army important benefits.

First, since all three branches of the Armed Services will be operating C-12s, mass production economies can be realized, and unit costs will be held to a minimum.

Second, the Army will have access to an even greater number of C-12 service technicians and service facilities than ever before. This fact, plus the record of over 90% operational readiness these airplanes are maintaining, translates directly to less downtime.

Presently, the Army is using its C-12s as military personnel and cargo transports. But the number of other applications for this versatile jetprop are almost limitless. They can be outfitted for many kinds of special missions to meet the Army's most demanding needs. A few of the many available special mission packages include: aerial surveillance, ECM, Side Looking Radar (SLAR), remote sensing, and tactical field support.

If your command could use an aircraft with this much versatility, call or write for more information. E.C. Nikkel, Vice President, Aerospace Programs, Beech Aircraft Corporation, Wichita, Kansas 67201. (316) 681-8175.

U.S. Army UNODA  
First Production  
BLACK HAWK

**D**URING a formal acceptance ceremony held October 31, 1978 the US Army accepted the first production model of the UH-60A **Black Hawk** helicopter from the Sikorsky Aircraft Division of United Technologies Corporation.

**Gerald J. Tobias**, Sikorsky president (opposite, at lectern), presented the keys to the aircraft to **Lt. General Robert J. Baer**, Deputy Commander for the Army's Materiel Development and Readiness Command. Also participating in the ceremony was **Colonel Richard D. Kenyon**, Army **Black Hawk** Project Manager.

The signing of the documents signaled the official acceptance of the first unit of what is expected to be a procurement of more than 1,100 utility transport aircraft worth in excess of \$2.5 billion. Deliveries of the aircraft will continue through the middle of the 1980's.

**General Baer** said the **Black Hawk** will replace the UH-1 helicopter in carrying out critical missions for the Army. He noted, "From the start this program was structured to emphasize the lessons learned from years of helicopter experience and thus will provide the men and women of the Army with the best helicopter possible

from a composite of all technologies."

He said that during the development of the **Black Hawk** many hurdles had been successfully cleared since the basic development contracts were awarded in August 1972. He added, "Both the development and production efforts have benefited from the contributions of a large segment of the aerospace industry."

Following today's acceptance ceremony, **Colonel Kenyon** noted the first **Black Hawk** production model will be turned back to the manufacturer for validation of production configuration and flight performance.

A total of 200 **Black Hawk** helicopters, which have been designated to serve as the Army's primary combat/troop carrying air vehicle, have been authorized for production since the initial award. Value of the contract to date, including the recently announced fiscal year 1979 award of \$223.2 million for 129 aircraft, is more than \$400 million.

Meanwhile, the first lot of production aircraft is progressing and minor subassembly work has begun on a second lot of UH-60A's. While three aircraft will be delivered this year, a total of 46 of the new **Black Hawk** models are to be delivered in 1979.

# UH-60A ROLLOUT

The Army accepts the first production model of its new **Black Hawk** helicopter

ON this noteworthy occasion, I'd like to speak a few moments on sports . . . I'd like to pose that organized sports have become an integral part of American life . . . and when we look at our world on a day like today and see the autumn colors, we all have some relationship with a game called **football**.

We're related to **football** whether we've got youngsters in what's called the "ankle biters" league or as a coach of a huge league like **Charlie Crawford** who keeps football going in a city like St. Louis, whether we go to the collegiate games — or whether we're armchair athletes on Sunday, or even if we're sitting as most of us were last night watching a professional football game . . .

When we think of football we can go back and we can recall the "**Four Horsemen**" of Notre Dame, or even the two gentlemen called "**Mr. Inside**" and "**Mr. Outside**" who came from an obscure institution on the Hudson River. We recently had a gentlemen by the name of **Willie Joe Namath** who excited all of us in a quarterback role.

But as we consider those individuals, I think all of us realize that the outfit that wins the championship is not made up of individuals. It's made up of a **team** — and a **team** today in that complex sport is not the 11 people on the field.

It's an offensive **team**, a defensive

**team**, special unit, punters, place kickers, coaches, and many more. And I believe that to achieve the accomplishments that Sikorsky has today; the completion and presentation of the first production **Black Hawk**, we have operated in the same environment.

It's very complex, and there is a **team**.

The first part of that team is Sikorsky . . . Sikorsky and General Electric are the prime contractors who orchestrate and integrate all of the efforts. As important, we have some **500 subcontractors** on this program, each of which is vital whether they provide a small fastener, a complex computer, no matter what.

# The Warrant Officer

When was the rank created?  
Why was it created?  
The "Triple Ace" Warrant  
What happened to the 32,143  
Air Corps Flight Officers?  
Hollywood and the Warrant

**P**ROBABLY the most unique rank in the military service is that of warrant officer. Standing between the highest enlisted grade and the lowest commissioned rank, the warrant is a technical expert in his field. He is a person who, with the exception of those warranted from civilian life, represents the best material of the enlisted force.

The dictionary defines the word "warrant" as that which gives a right; authority; a written order giving authority for something. "Warrant officer" is defined as an officer who has received a certificate of appointment, but not a commission.

The basic difference between warrant and commissioned officers lies in the responsibility of command. With few exceptions, a warrant officer cannot command; his responsibilities are of a technical specialized nature. A warrant officer receives his appointment from the Secretary of the service of which he is a member while the commissioned officer gets his appointment from the President.

The warrant officer has been a part of the United States Navy since its earliest history. By a Congressional Act approved March 27, 1794, to provide a naval armament, warrant officers were sailing masters, pursers, boat-swains, gunners, sailmakers, carpenters, and midshipmen. On August 31, 1842, engineers were appointed to the Navy, the chief engineer being commissioned and the others warranted by the Secretary of the Navy.

Prior to the first World War the Army would not recognize the warrant officer of the Navy as an officer. Not yet having established the warrant rank, the Army classified them with noncommissioned officers. In inter-service operations this became a source of confusion, conflict of authority, and possible disaster.

The same difficulty occurred from time to time with the Marine Corps. Article 24 of a 1893 Navy Regulation stated that to regulate the rank of warrant officers by classifying them with noncommissioned officers of the Army would be to degrade them to persons of inferior rating. This problem continued to exist until 1918.

In 1915, the U.S. Coast Guard was formed with the merger of the U.S. Revenue Cutter Service and the U.S. Life-Saving Service. The former, originally called the Revenue Ma-

By Captain  
**WILLIAM D. HOBBS, USAFR**  
Ent AFB, Colorado

rine, was established in 1790. The first mention of a warrant officer is contained in the Rules and Regulations for the Government of the U.S. Revenue Marine issued on November 1, 1843, which stated: "Pilots, engineers, boatswains, gunners, and carpenters will hold their appointments under warrants issued by the head of the Treasury Department."

## Standards for uniforms

These regulations also provided standards for uniforms of captains, first lieutenants, second lieutenants, third lieutenants, warrant officers, and seamen. Since the list didn't include the noncommissioned officer category it is thought by some Coast Guard officials that the warrant officer of 1843 was more like the petty officer of the present.

The Register of Officers and Vessels of the Revenue Cutter Service, dated July 1, 1899, lists warrant officers as follows: 13 boatswains, 6 gunners, 13 carpenters and 1 chief oiler, all with dates of appointment of August 2, 1898. With the exception of the chief oiler, footnotes indicate the men served previously in the *rate* of boatswain, gunner or carpenter. Therefore, based on this register, it is believed that the Coast Guard warrant officer, as he is known today, had his beginning on August 2, 1898.

The Marine Corps warrant officer came into being in 1916. The proviso authorizing the warrant grades of marine gunner and quartermaster clerk was part of a major piece of legislation passed just months before our entrance into World War I. Twenty of each were authorized.

## First Army WO's in 1918

The rank of Army warrant officer was originated in July, 1918, with the establishment of the Army Mine Planter Service in the Coast Artillery Corps. WO's were appointed to serve as masters, mates, chief engineers, and assistant engineers on the small ships used by the Army to plant water mines. The annual salary ranged from \$972 for a second mate to \$1,800 for a master. By June 30, 1919, there were 37 warrant officers in the Army Mine Planter Service.

An Act of Congress passed June 4, 1920,

# Warrant Officer flight training

IN TODAY'S ACTION

## Army

Army recruiting brochures encourage high caliber high school pilots who have a desire to fly to apply for warrant officer flight training.

An Act of Congress passed June 4, 1920, provided for 1,120 warrant officers in the Army, including band leaders. This was in addition to those already authorized for the Mine Planter Service.

Warrant Officers of the Mine Planter Service wore the uniform of officers without the insignia of rank. Also, they wore the insignia of the Coast Artillery Corps with a submarine mine added. In addition, they wore special braid on the sleeve. WO's of other services wore the uniform of commissioned officers without insignia of rank. Their uniform had no braid on the sleeve unless the individual had commissioned service during World War I. In the latter case he was permitted to wear braid of forest green.

## "Mister" and the Eagle

In 1921, Army warrant officers were authorized to be addressed as "Mister." That same year the WO's in the Tank Corps received as an insignia an eagle standing on a bundle of arrows, all enclosed in a wreath. Five years later this insignia was authorized for all Army warrants and is still worn today.

In 1926, the civilian grades of Army Field Clerk and Field Clerk (Quartermaster De-

O&T: SIP. Advanced Acft: T-42.

MUSEUM BOOST-Colonel Wayne N. Phillips, Ret., left, of Santa Rosa, California, and Thomas J. Sabiston, curator of the Army Aviation Museum at Ft. Rucker, Ala., look at the items Phillips donated to the Museum during his October visit. The former Master Army Aviator wore the flying suits while serving in World War II with the 9th Infantry Division in Europe. Some of the unit plaques they're viewing were donated by Colonel Robert K. Moore, Ret., of Minnehaha Springs, W. Va. Both Phillips and Moore served at Fort Rucker while they were Army Aviators.

MURKLAND, PETER H. .... (CW2) (AAAA-1975)  
1432-A Werner Park, Ft. Campbell, KY 42223. Born Jan

NOW HE HAS TWO—There are now two women flight surgeons on Colonel (Dr.) Daniel T. Sanders' staff at the Army  
Aeromedical Center, Fort Rucker. Also he talks with Captain (Dr.) Corrine E. Lahti, center, of Tigard, Ore., and Captain (Dr.)  
Mary L. Osborn of Fletcher, N.C., after they graduated recently from the flight surgeon's training at Rucker. They are the  
second and third women to complete the course. (U.S. ARMY PHOTO)

# We solicit your nominations for AAAA national awards covering unit and individual accomplishments during CY 78.

Be a participant in the selection of  
the "Aviator of the Year" and  
the "Aviation Soldier of the Year."

Write to AAAA for the one-sided,  
simple nomination form that will put  
your candidate into the hopper for  
national recognition at the coming  
AAAA National Convention. Many  
deserving people are never  
recommended because they are  
never nominated. AAAA's  
"Outstanding Aviation Unit Award"  
along with its "Outstanding  
Reserve Component Aviation Unit  
Award" recognize the finest unit  
performances during the 1978  
calendar year. DOES YOUR UNIT  
MEASURE UP? The "James H.  
McClellan Aviation Safety Award"  
and the "Outstanding DAC Award"  
single out unique people. Tell us  
about them! The '78 nominations  
will close on Thursday, Feb. 1.

Your nominations' data should be  
submitted to: AAAA, Attn: Nat'l  
Awards Chairman, 1 Crestwood  
Road, Westport, Conn. 06880.

## M Who's Who in Army Aviation

## THE WARRANT OFFICER

(Continued from Page 24)

partment), which had been in existence in one form or another since 1903, were abolished. Although these personnel were considered civilians it was determined by the Army Judge Advocate General that they held military status. The personnel in these positions when they were abolished could elect to be appointed warrant officers. An interesting fact is that two female Army Field Clerks were among those warranted, but they retired shortly afterwards.

In the mid 1920's Congress established the Marine Corps warrant grades of chief marine gunner, chief quartermaster clerk, and chief pay clerk. For promotion to chief an examination was required plus six years in grade. Similar warrant grades were also instituted in the Navy.

### 1939-1940 Staff Study

The War Department General Staff surveyed the entire Army WO situation in 1939 and '40 to determine their place in the "new" Army. Their study showed a vital need for expert administrators and technicians, who'd be assigned on a permanent, full-time basis to specific positions. Public Law 230 of the 77th Congress was enacted, authorizing the appointment of warrant officers up to one per cent of the Regular Army's enlisted strength.

On August 21, 1941, the Army grade of

One of the most famous warrant officers was Air Force CWO William R. Dunn, America's first World War II ace who had 15½ kills.

chief warrant officer came into being. The lower grade was then known as warrant officer (junior grade). This change also included WO's of the rapidly expanding Army Air Corps.

Until 1942 the shoulder loops of Army warrant officers were bare of any symbol of rank. In that year a bar with rounded ends and brown enamel top, with a latitudinal gold strip was authorized for the WO (j.g.). The CWO wore a similar bar with a longitudinal center strip of gold. Naval WO's wore a half-stripe or "pin stripe" on the lower sleeve of their winter uniform and on the epaulet of the summer uniform. The chief warrant officer was identified by a broad gold broken stripe. Navy and Coast Guard warrants are still identified by similar insignia.

### The Flight Officer

Shortly after the United States entered World War II, the Air Corps was confronted with the problem of how to deal with those flying school graduates who were good officer material and those who, because of the lower standards necessitated by the war, did not measure up to the desired qualifications for commissioned officers. The solution to the problem was thought to be the creation of a new grade — the flight officer.

The flight officer corresponded to the warrant officer (j.g.). The insignia was the same design, except it was blue instead of brown. The FO also wore the warrant service cap device. By June, 1945, the number of flight officers had swelled to 32,413, but by 1947 all FO's had been commissioned, reduced to sergeant, or discharged, or had been killed in action or accident. The grade of flight officer had passed into history.

Today, there are a few Air Force NCO's who were flight officers and who, for some reason, were never commissioned. After a total of 30 years active and retired service these individuals are eligible to advance to warrant officer (W-1) on the retired list, draw the retirement pay of that grade, and have the privileges of a retired officer.

The warrant officer program was carried over into the Air Force when it became a separate branch of the service. The Air Force soon dropped the Army WO service cap in-

signe — an eagle with arrows and wreath — and permitted its warrant officers to wear the insignia of commissioned officers.

In 1949, the pay grades of W-1, W-2, W-3, and W-4, were established. Presently, in all services, the W-1 is known as warrant officer and the other three grades are chief warrant officer.

## Misconception on pay

A popular misconception about the chief warrant officer (W-4) is that he makes the same salary as a major. To compare the pay of one rank with another one must look at the two ranks in the same longevity scale. Take, for instance, the major who draws the maximum salary, approximately \$13,558, including allowances, at 18 years service. For a fair comparison one must look at the W-4 with 18 years. His total salary is approximately \$11,355 — a difference of \$2,204 a year. Even the W-4 with 26 years longevity, drawing the maximum annual salary of \$12,712 is still \$846 short of the major who reached his maximum at the 18-year mark.

Much to the disappointment of many enlisted men, no Air Force warrant appointments have been made since April, 1959. Lt. Gen. Horace W. Wade, former Deputy Chief of Staff, Personnel, put it this way: "In a choice between a college graduate with a capability to adjust to the changing technology of our weapons systems, and a technical specialist with potential limited to a specialty, we have concluded that the college graduate can give us a better return in terms of efficiency and dollar costs. Limited Duty and Warrant Officer programs are not, therefore, consistent with our commissioned officer qualitative goals."

## Interservice transfers

Although the Air Force no longer has a warrant officer program the Army welcomes applications for warrant appointments from high caliber enlisted men of other services. In recent years several hundred Air Force sergeants have switched to the Army to become WO's.

The Army is the only service that actively recruits warrant officer candidates from civilian life.

Medal of Honor winner CWO (now Captain) Frederick E. Ferguson (2d from left) and artist WO Chester Jerzerski hold painting depicting former's combat action in Vietnam, as MG George W. Beatty, Jr., far left, representing USAAVNC, and William Howell, far right, Aviation Museum recipient, look on. Award was made at AAAA's 12th Annual Meeting in Washington.

The Army also offers warrant appointments to registered nurses who are graduates of a two year nursing school. Presently there are about sixty R.N.'s who have been warranted.

## Hollywood and the WO

Hollywood has generally ignored the warrant officer in movies, preferring instead, scripts about the "Old Sarge" as exemplified by James Whitmore in "Battle Cry," or the young second lieutenant portrayed by Robert Wagner in "The Hunters." The iron-fisted Colonel in the form of Rock Hudson getting B-52's off the ground in "A Gathering of Eagles" is always good box office.

In the film "They Were Expendable," character actor James Gleason was seen as a seasoned Navy chief petty officer. He confided to a young seaman that the reason he hadn't applied for a warrant was because he was afraid the physical examination would disclose his worsening heart condition and he would be forced to retire.

## THE WARRANT OFFICER

(Continued from Page 38)

Walter Brennen once played a secondary role as a Coast Guard warrant officer in a salt-water epic of the early 1950's. But only recently has there been a movie with a WO as the principal character.

In 1968, United Artists released a motion picture with a Navy aviation chief warrant officer as the main character. The film was "*Yours, Mine, and Ours*" with Henry Fonda as the chief warrant. In a supporting role, as Henry's bachelor buddy, was Van Johnson, also a CWO.

More recently, a real Air Force chief warrant officer played the part of a mission controller in the science fiction movie "*2001: A Space Odyssey*." The film director chose CWO Franklin W. Miller for the small part, after screening several real life air traffic controllers, because he had "the right voice."

### Same celebrated WO's

Several warrant officers have figured prominently in the events that have shaped history. Take, for example, CWO Edwin J. Hill, USN. He was awarded the Medal of Honor for "*extraordinary courage and disregard of his own safety during the attack on the Fleet in Pearl Harbor on December 7, 1941.*"

A second warrant officer, CWO (now Captain) Frederick E. Ferguson, became the first Army Warrant Officer to ever receive the Medal of Honor. An Army Aviator and helicopter pilot in Vietnam, he voluntarily rescued five of his comrades in an extremely confined area on May 17, 1969, while under heavy mortar and small arms fire.

The person who is supposed to be never more than a few seconds away from the President of the United States is an Army warrant officer. He is known as the "Bag Man" because of the attache case he always carries. In the case is the electronic apparatus with which the President could call, in code, for a nuclear attack. When President Kennedy was assassinated in Dallas, the Bag Man was WO Ira Gearhart.

Among the USS Pueblo's six officers cap-

tured by the North Koreans in January, 1968, was a chief warrant officer, CWO Gene Lacy, who served as the intelligence ship's chief engineer.

Two warrant officers have been members of the Presidential Aircrew since the first specifically designated Presidential aircraft was placed in service in 1944. They were CWOs John J. Higgins, who retired two years ago, and John R. McLane. Mr. McLane was the aircraft performance officer for Air Force One. He retired in February, 1969.

### The most famous WO

The most famous warrant officer on active duty is CWO William R. Dunn, America's first World War II ace. As a Spitfire pilot, he score 5½ victories while assigned to the famed Eagle Squadron of the Royal Air Force before the United States entered the war. Mr. Dunn transferred to the U.S. Army Air Corps in 1943 where he brought his total number of enemy aircraft shot down to 15½.

Through the Navy's warrant officer program, the outstanding enlisted man can advance to WO status . . . and that need not be the end. Moving up through the warrant pay grades he may eventually qualify for promotion to ensign or lieutenant (j.g.) and continue on up the promotion ladder.

### A true technician

It can be concluded that the warrant officer was created to identify an expert in a technical field. He was given this "in between" rank to allow for the latitude of authority and freedom movement enjoyed by commissioned officers.

At the same time, he was not encumbered by the problems of command or the limitations of authority and responsibility of the enlisted man. The NCO had a distinct responsibility to the men themselves — to train and lead. Removed from the many traditional aspects of military life, the warrant officer was the military's first attempt at producing a true technician.

In the annals of the unusual facets of the military the rank of warrant officer is etched. Born of 18th century naval heritage the warrant officers, though few in number, have made their mark in history.

## On to the Super Bowl!

(Continued from Page 16)

---

There are a lot of **green suits** around Sikorsky. They represent the **Department of Defense**. Not only **green suits**, but other colors as well. There's the **Black Hawk Program Manager's Office**; the local **Naval Plant Activity** headed by **Rick Harvey**; there's the local office of the **Defense Contract Audit Service**, involvement from the **Department of the Army Staff**, the staff of **DARCOM** in Washington, **AVRADCOM** which has an integral part the engineering effort and procurement function, and additionally has other elements involved such as the **Army Experimental Flight Activity** and the **Advanced Technology Laboratory** at Ft. Eustis.

Another organization from St. Louis is the **Troop Support and Aviation Readiness Command**. The troops in the field from **TRADOC**, or the **Training and Doctrine Command**, represented by the System Manager's Office.

Units have tested this bird already. Units like the **101st Airborne Division**. And other project managers make contributions, like the **Program Manager/Training** who provides all of the training devices for this system.

**Health Sciences Command** represents the **Surgeon General** for medical service. The **Army Development Test Activity**, **Advance Materials Systems Analysis Agency**, **Operational Test and Evaluation Activity** . . . I could go on and on.

But I say that that's a complex **team** the way a football **team** is, and it is a

team that has shown it's dedicated to winning. To go back to football for a minute . . .

Who does the football team try to please? . . . Who do they serve? . . . In the long run, it's the **fans** in the stadium. We have **fans**, too!

Those **fans** are the troops, the men and women of the U.S. Army . . . and they're about to judge us on the quality and capability of this **Black Hawk** that we're sending to them in the field. And I believe right now they will be tremendously impressed and happy with the product that they're getting.

Within this football analogy then, where are we and when are we going?

**We've got a good record going.** In order to sustain and improve that record, we've got to continue to work together as a **team**. We have to listen to and heed our fans — the troops in the field. We should always be ready to improve our product and never rest on our laurels.

I guess I'll say that we've won the division title and now we've got to go on and win the **Super Bowl** . . . and for us the **Super Bowl** is that point when we have a large number of **Black Hawks** in the field with an unqualified degree of success — and happiness on the part of the using community.

This **Black Hawk** is the first of a new generation of helicopters for the U.S. Army. It's a real demonstration of tremendous accomplishment. These accomplishments were made possible by many dedicated, competent personnel working together as a **team**.

I, myself, am proud to be a member of that **team** and commend Sikorsky and their industry participants for a job well done. ◀

# UH-60A ROLLOUT

Above: A part of the hangar assemblage is shown during the acceptance ceremony. Below: Cake-cutters Tobias and Baer are shown with, left to right, Col. Richard D. Kenyon, Program Manager, Black Hawk; Eugene Buckley, VP - Black Hawk

Above: Sikorsky President Gerald J. Tobias. Below: Col. Richard D. Kenyon.

**Program; Mr. Tobias; LTG Baer; Edward L. Hennessy, Jr., Executive Vice President, United Technologies Corp.; and Harry J. Gray, Chairman & President of UTC. Some 600 persons represented military, subcontractor, and Sikorsky program involvement ◀**

**Above: Lt. Gen. Robert J. Baer, Deputy Commander, U.S. Army Materiel Development & Readiness Command, is given the "papers" on the first production UH-60A Black Hawk by Gerald J. Tobias, President, Sikorsky Aircraft.**

# SIKORSKY

**The one helicopter  
that's built today  
to survive in tomorrow's  
hostile environment.**

**Sikorsky's Black Hawk.**

There's no doubt that the Sikorsky Black Hawk is survivable.

- It is invulnerable to 7.62 mm fire.
- The main rotor head and rotor blades can tolerate 23 mm HEI.
- The dynamic component systems can all tolerate multiple hits.
- The vertical stabilizer provides stability after tail rotor loss.
- To minimize forced landings, the engines and all controls are redundant.

- The aircraft is designed and built for the high threat environment.

And when things get rough, this is the kind of aircraft any soldier wants to fly or fly in. Sikorsky Aircraft, Main Street, Stratford, CT 06602.

TECHNOLOGIES.**

# Helicopter Instructor Pilots

## Bell Helicopter Wants You to Join Us...in Iran

Bell Helicopter International is involved in an extensive program in Iran. If you are a top professional looking for something different in your career, we want you to be there with us.

Requires total rotor wing pilot time of 1500 hours. Minimum rotor wing instructor pilot time 250 hours. C.F.I. Helicopter required. If accepted, C.F.I. may be obtained after offer of employment.

In addition to paying your transportation and relocation expenses, Bell Helicopter will provide you with a highly-competitive income and a generous benefits package which includes a housing supplement, travel and cost-of-living allowances, and overseas bonuses.

# Iran

**T**HE Aviation Logistics Office (ALO), Deputy Chief of Staff for Logistics (DCSLOG), HQDA, is the management agency for the Army's aviation logistics program for aircraft systems during the complete life cycle process — in layman's terms, from the cradle to the grave.

As a single coordinating and management agency within DCSLOG, this office is responsible for initiating and implementing logistic concepts, policies, practices, and techniques unique to Army Aviation.

Additionally, this office also assures continuity of an integrated Army Aviation logistics support system; evaluates logistics readiness of aeronautical materiel within Army Aviation; reviews and evaluates force structure development plans as related to aviation logistics; and coordinates aviation logistical aspects of security assistance.

# A Look at Logistics!

**A Capsulized Mission Summary of the Aviation Logistics Office, ODCSLOG, Dept. of the Army**

As shown in the accompanying chart, the **Aviation Logistics Office** is headed by **Mr. Joseph P. Cribbins**, who is also Special Assistant to the ODCSLOG. He serves as the principal advisor to the DCSLOG for all aviation logistics and related matters, and is the Army Staff focal point and principal spokesman on aviation logistics.

The three action officers and executive assistant support **Mr. Cribbins** in accomplishing this most challenging mission.

## AVIATION LOGISTICS OFFICE — ODCSLOG, DA

## CHALLENGES

(Continued from Page 2)

But doubt lingers in other areas and it is up to those of us who have the opportunity to serve the Army in positions that interface with those who doubt, to convince them there is this role which can and must be played.

### We must be mobile!

Today's battlefield dictates to us that we must be mobile. We must be able to move to meet unanticipated thrusts a very short time. The only way we can do that is to use on that battlefield that

which many of you here, in the past, have developed through your perseverance as a potential which must be exploited.

We face other challenges in the field of Army Aviation and I suspect some of them have been discussed here during your meetings. You see, we need more aviators - and the cost of flight training is high - and we must justify the numbers which we must train, and it may not be easy. As you know, we are looking at the career pattern of Specialty 15, the Army Aviator, the aviation specialist, a specialty.

### Tough decisions ahead

There are some tough decisions that have to be made when you attempt to balance several things: the need for more aviators; the desire to keep those aviators we have in the program dedicated to the program and not turned off; the constraints within which we must work; and the development of our level of expertise so that when you put 11 soldiers in the back of a **Black Hawk** — and you are flying NOE in the middle of the night — we'll know that the aircraft with those soldiers is going to get to its destination.

I have digressed completely from what I had intended to say — and I am taking advantage, as did one of the previous speakers, of showing you how long a time four minutes really can be. But as I got here on my feet, there were some things that I also wanted to get off my chest. . .

\*\*\*\*\*

(General Rogers made the foregoing extemporaneous remarks prior to making the formal award presentation to the AAAA's 1978 "Outstanding Aviation Unit of the Year.") ◀

#1—Selected as AAAA's "Outstanding Chapter Activity of 1978," the 345-member Corpus Christi, Texas Chapter received the traditional "Top Chapter" lectern seal at the October National Convention. Chapter officers shown are, first row, Sylvia Barcak (VP, Publicity), Sandra Strub (VP, Benefits), and Peggy Rutter (Sec). 2nd Row, CPT Bob Chastine (VP, Activities), Jerry New (VP, Membership), and Cotton Lange (SrVP). 3rd Row, COL Chuck Drenz (Pres), Errol Herwig (Trea), and Tony Torres (Member-at-Large). USA photo

## What's special about these aircraft?

## They're all flying right now with J.E.T.'s Digital Airborne Computer, 3-D R-NAV System.

Area navigation (R-NAV) systems have been around for awhile. But none like this one.

We didn't jump into the R-NAV business heller-skeiter, as some did. We know, as you do, that R-NAV, as any other optional equipment on your aircraft, has to provide an important benefit — reliably, efficiently. This one uniquely does.

Like enabling you to fly total straight-line, point-to-point missions. Onroute or offset. Saving time. And fuel. And money.

Like offering you automatic vertical mode flying without altitude restriction. No other R-NAV does.

Since certification in November, 1976, we've been working closely with our initial operators. And we are tremen-

dously encouraged by the reports they pass along to us.

They appreciate our accuracy, both in horizontal and vertical modes.

And they've discovered for themselves the time-saving benefits of our 200 waypoint permanent, non-volatile memory.

Best of all, they've discovered our DAC-2000 is much more than simply a 3-D R-NAV. It gives them the versatility of an on-board multi-purpose computer system. It can be expanded for insertion of waypoints using a hand-held calculator plus display R-NAV information on a radar screen.

Give us a call. Let's talk specifics about how DAC-2000 can work for you. Call our commercial marketing department, (616) 949-6600 or see your nearest J.E.T. distributor.

# Life Membership

## AAAA Enrollment Plan to End Dec. 31

**A**T its February 12, 1977 meeting in Washington, D.C., AAAA's National Executive Board approved a Life Membership Program, with an effective starting date of April 1, 1977.

A member-applicant would make a one-time \$150 donation to the "AAAA Scholarship Foundation, Inc." and forward his donation directly to the Foundation at 1 Crestwood Road, Westport, CT 06880.

The AAAA — on notification from the Foundation of the member's donation — would provide a Life Membership to the applicant with appropriate credentials signifying "Life Membership" to follow in a later correspondence.

The AAAA Scholarship Foundation would retain the \$150 sum in the donor's

name, and on his or her death would — together with all other funds received in memory of the donor — provide a Memorial Scholarship in the donor's name in the academic year following his or her death.

The \$150 donation to the AAAA Scholarship Foundation, Inc. would be considered deductible for tax purposes.

The 1978 "Life Membership Program" enrollment will cover a four month period, and terminate on December 31, 1978. A consolidated roster of Life Members enrolling in AAAA will appear in the October, 1978 Convention Issue of "Army Avia-

A member may request that his current year dues — if already paid — be credited towards his "Life Membership."

**AAAA Life  
Membership Form  
Complete and return  
to:**

**AAAA Scholarship  
Foundation, Inc.  
Crestwood Rd.  
Westport CT  
06880**

### APPLICATION FORM FOR LIFE MEMBERSHIP

I would like to enroll as a **Life Member** of the AAAA, and have enclosed a check made payable to the **AAAA Scholarship Foundation, Inc.** in the amount of \$150.00. I understand that my donation is tax deductible, that the donation — along with other funds donated in my name — will underwrite an AAAA Memorial Scholarship in my name on my death, and that I hereby authorize the use of the funds for this purpose. When available, please forward my **Life Membership** credentials to me at the address appearing on the enclosure.

# SINGGARS-V.

## ITT has the technology to make it a reality.

The Army demands a lot from SINGGARS-V—the tactical radio system of the eighties and beyond. Affordability. Simplicity. Portability. Dependability. Versatility.

ITT will deliver these features . . . and a lot more.

Designing a tactical radio system that will serve as a primary means of communication among forward combat units and also be organic to combat support and service units takes solid engineering. It requires proven experience and technology. The kind of experience and technology that have made ITT the world leader in mil-spec ground-to-air communications.

At ITT, we know what we're doing. We have over 200,000 units operating worldwide to prove it.

ITT Aerospace/Optical is proud to join the Army in developing SINGGARS-V.

# ITT

## APPLICANTS FOR 1979 SCHOLARSHIP AID SOUGHT BY AAAA

The AAAA Scholarship Foundation, a separate non-profit educational activity created to provide scholarship aid to the sons and daughters of AAAA members and deceased members, announces the availability of assistance funds for the 1979 college-entry year. Program participation is limited to the children of members with an effective date of membership on or before March 31, 1978.

### Application Procedure

Student-applicants are asked to request the appropriate application forms by writing to the AAAA Scholarship Foundation at 1 Crestwood Road, Westport, CT 06880. The applications, together with other supporting data, must be returned to the Foundation on or before March 1, 1979 to receive Awards Committee consideration. The student-prepared application should state the full name of the applicant's father-member.

### Eligibility Criteria

The AAAA applicant must also be: (1) a high school senior who has applied to an accredited college or university for Fall, 1979 entry as a freshman; and (2) unmarried.

### Selection & Notification

Selection of winners will be made during the month of March 1979 with each applicant to receive a list of the winners not later than 1 April 1979.

### Background Data

Incorporated in December 1963, the AAAA Scholarship Foundation provided 22 scholarships in 1978, and has furnished more than \$60,900 in direct aid.
